## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Tschegg (US 5,496,130).

Regarding claim 1, Tschegg teaches using a failure assessment diagram (FAD) assessment curve from a crack initiation based FAD analysis to analyze a crack in a material (column 2, lines 1-5); and using a ductile tearing analysis in conjunction with the FAD assessment curve to detect a crack exhibiting at least one of ductile tearing stability and tearing instability prone to rupture during growth of the crack (column 2, lines 10-16).

Regarding claim 14, Tschegg teaches that the crack is one of a single crack and a crack field disposed in a pipeline (column 1, lines 64-65).

### ***Allowable Subject Matter***

2. Claims 2-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2863

The primary reason for the indication of allowability of claim 2 is the inclusion of the limitation that the ductile tearing analysis takes into account an increase in a material fracture toughness during the crack growth. It is this limitation in the claimed combination that has not been found, taught, or suggested by the prior art that makes these claims allowable.

3. Claims 15-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claim 15 is the inclusion of the limitation that the ductile tearing analysis takes into account an increase in a material fracture toughness during the crack growth. It is this limitation in the claimed combination that has not been found, taught, or suggested by the prior art that makes these claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
